EDUCATION

Texas A&M University

Bachelor of Science in Computer Science, Minor in Statistics: GPA: 3.77

College Station, TX

Aug. 2023 – Present (Grad: 2027)

TECHNICAL SKILLS

Languages: TypeScript, Python, JavaScript, Java, C++, Swift, SQL, R, HTML/CSS

Frameworks/Libraries: React, Node.js, Flask, OpenCV, NumPy, pandas, Selenium, BeautifulSoup, Matplotlib

Developer Tools: Git, Docker, MongoDB, Azure, REST APIs, LLMs, Embeddings, CI/CD, Agile/Kanban

Courses: Data Structures and Algorithms, Database Systems, Artificial Intelligence, Machine Learning

EXPERIENCE

Microsoft

Software Engineering Intern

May 2026 - Aug. 2026

Redmond, WA

- To be completed Summer 2026

Microsoft Explore

May 2025 - Aug. 2025

Software Engineering + Product Management Intern

Redmond, WA

- Designed and shipped a customer-facing **AI-powered Least Privilege Recommender** in the Microsoft Entra portal, writing clean, tested, full-stack code to reduce **over-privileged access** and strengthen identity security for millions of users.
- Architected an **LLM** back-end pipeline with **Azure OpenAI**, **Semantic Kernel**, and **embeddings** to automate privilege analysis, decomposing an ambiguous problem space into a clean, production-ready solution.
- Collaborated cross-functionally with senior engineers and PMs through **code reviews** and **Agile** sprints, communicating tradeoffs clearly and iterating on feedback to ship user-first deliverables.
- Delivered an end-to-end **POC** in a **Kanban** workflow, presenting to stakeholders and receiving approval for the production roadmap.

TAMU RoboMasters Computer Vision Team

Sept. 2024 - Feb. 2025

Team Member

College Station, TX

- Collaborated in a team using **Git** to develop computer vision capabilities including auto-aim, localization, and icon detection for RoboMasters competition.
- Built computer vision algorithms to detect numbers on enemy armor plates with a **90%** accuracy rate.
- Optimized algorithm to compute classification for a frame in **30ms**, a **22%** decrease in computation time compared to previous method.

PROJECTS

Pupil - Agentic AI Shadowing Framework | Python, Claude API, Playwright, ChromaDB, Embeddings

Feb. 2026

- Building an **AI-native** agent framework that shadows engineers during live workflows, learns operational patterns via **embeddings** + vector search, and autonomously executes repetitive tasks.
- Architected a multi-phase, multi-agent learning pipeline with structured context modeling and **LLM orchestration**, enabling scalable, human-in-the-loop automation that puts the user in control.

CORTEX - Complete Travel Ecosystem | Swift, OpenCV, MongoDB, ARKit, CoreML

January 2026

- Placed **1st Place** at TAMUHack out of **650+** participants.
- Built a smart travel assistant using a **Computer Vision** + **AR** pipeline to track personal items and luggage in airports, guiding users back via a 3D terminal view.
- Developed a **low-latency** voice agent with **sub-2s** responses using **Gemini 2.0 Flash** + **ElevenLabs**, integrated with airline **REST APIs** for instant gate and flight info.

FindMoto | Python, Notion API, Selenium, CronJob

July 2024

- Placed **1st Place** in TACS Build4Good Hackathon
- Architected an automated **Notion API** integration with Python + Selenium that scrapes, structures, and syncs motorcycle deals into a Notion database, scheduled via **CronJob**

Ember - Fire Damage Visualizer | Python, Flask, React, Plotly, OpenAI API, REST-API

Jan. 2025

- Placed **2nd place** in ARM challenge at TAMUHack.
- Built a **full-stack** app (**Flask** back-end, **React** front-end) consuming government **REST APIs** and **OpenAI API** to visualize LA fire damage on an interactive Plotly dashboard.

LLM Rate My Professor | Google Gemini API, Python, Selenium, Flask, HTML, CSS

Dec. 2023

- Built a **full-stack** web app with a **Flask back-end** that scrapes Rate My Professor reviews via Selenium and summarizes them using **Google's Gemini LLM API**.

ACHIEVEMENTS

1st Place: TAMUHack 2026 Hackathon (650+ competitors.)

1st Place: Notion-API Texas A&M Computing Society Build4Good 2025 Hackathon

2nd Place: ARM challenge TAMUHack 2025 Hackathon

Top 20: Among 500 teams Headstarter Hiring Hackathon 2025
